[1] The patent numbering system began with a patent issued on July 15, 1836 under the Patent Act adopted July 4, 1936. Up to this time, a total of 9,957 patents had been issued.

[2] The number of patents issued during a year may be fewer than the number derived by subtracting the number of the first patent issued in one year from the number of the first patent issued in the next year. Some numbers in the series may not be used. This results when an application scheduled to be patended and to which a patent number is assigned is withdrawn for some reason at a time when it is too late to reassign that number.

[3] Not separately numbered until 1838.

[4] A new numbering system for Defensive Publications was adopted in December 1969. A conversion table reflecting this change appears in the Official Gazette of December 16, 1969, vol. 869, pages 687 and 688.

Beginning in 1985 Statutory Invention Registrations were issued and numbered H000001 thru H000006. The number range for 1986 was H000007 thru H000181 and the number range for 1987 was H000182 thru H000395.
